NEWSLETTER FROM Diab

No. 10 | AUGUST 2018

Welcome to our Newsletter! You just need a few minutes to stay up-to-date with the world of composite materials and we promise it is worth the read! In this issue we present our new CEO, you can read about Barcoo Drift - a fisherman's dream, the next exhibitions in which Diab will take part, and learn more about our work with sustainability, among other things.

## NEW CEO FOR DIAB GROUP

**Tobias Hahn**

### Tobias Hahn new CEO for Diab Group

Tobias Hahn has been appointed new CEO for Diab. Tobias has 10 years of operative and international experience from the Atlas Copco Group. He is coming from the role as President for Industrial Assembly Solutions. Before that he had various positions within ITT Flygt, both in Sweden and the USA. Tobias will join Diab at the beginning of September.

## RENEWABLE NEWS

### Science Based Targets, SBT

As reported since early 2017, Diab has committed to set Science Based Targets, SBT. As a quick reminder, this means that Diab Group has adopted targets to reduce greenhouse gas (GHG) emissions that are considered "science-based". This is fulfilled if the level of decarbonization for the company is set to keep the global temperature increase below 2°C. We are expecting to be approved within short and will keep you updated in coming issues.

## UPCOMING EXHIBITIONS

**China Composites Expo 2018**  
The 24<sup>th</sup> China International Composites Industrial Technical Expo  
Shanghai World Expo Exhibition & Convention Center (SWEECC)  
September 5 – September 7, 2018

### China Composites Expo 2018

...in Shanghai, China,  
from September 5 to 7.  
**Stand no. A315, Hall 1**

### AIX Boston 2018

...in Boston, Massachusetts, USA,  
from September 25 to 27.  
**Stand no. 712**

25 – 28 September 2018 | **Hamburg**

### Wind Energy Hamburg 2018

...in Hamburg, Germany,  
from September 25 to 28.  
**Stand no. A1.107**

### IBEX 2018

...in Tampa, Florida, USA,  
from October 2 to 4.  
**Stand no. Diab:1233 & CCG:1346**

## CUSTOMER SURVEY

### Really positive results from our customer survey

A customer survey was conducted in June-July to identify, measure and develop Diab's success factors. 249 telephone interviews were performed with customers from all over the world.

The survey provides answers to important questions such as key customer requirements, strengths and weaknesses, how our customers rate Diab in our core areas and in which areas we need to improve and develop the most.

55% of these 249 customers are overall very satisfied with Diab as a supplier and 42% are satisfied. This is a great result, the best ever, and we are delighted to share it with you.

We will use the result to implement projects and measures for improvement to develop key success factors and increase customer satisfaction going forward.

## DID YOU KNOW

### Brochure update

A brand new truck brochure has been published. Please check it out at our website: [www.diabgroup.com](http://www.diabgroup.com) under Knowledge - Downloads.

## DID YOU KNOW

...Optimized for fishing, the 14 m long vessel Barcoo Drift will be used on the Barcoo River in Queensland, Australia. It was designed by Roger Hill Yacht Design, New Zealand, and built by Julian Griffiths and his team in Noosa Marine, Australia, using sandwich core composite materials from ATL Composites in co-operation with Diab.

To provide extra strength while keeping the vessel light, Divinycell HM100 was engineered into the hull bottoms and lower topsides. This way the boat can absorb high dynamic impacts and slamming loads without adding weight to the construction.

All other structural sections including bulkheads, hull soles, cabin sides, side decks, etc. were supplied as CNC-routed DuFLEX Component Packs cored with Divinycell H80. Providing excellent mechanical properties and low weight, Divinycell H is an all-purpose grade with a proven track record in virtually every application area where sandwich composites are employed.
